                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              UG-08-159-338A-134

Sequence 134, Application US/08159339A

Sequence 134, Application US/08159339A

Sequence 134, Application US/08159339A

Patent No. 6037135

APPLICANT: Kubo, Ralph T.

APPLICANT: Sette, Alessandro

APPLICANT: Celis, Esteban

TITLE OF INVENTION: HLA Binding peptides and Their

TITLE OF INVENTION: Uses

NUMBER OF SEQUENCES: 1254

CORRESPONDENCE ADDRESS:

ADDRESSEE: Townsend and Townsend and Crew LLP

STREET: TWO Embarcadero Center, Eighth Floor

CITY: San Francisco
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               STATE: CA

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Sequence 52, Application US/09157230
Patent No. 6046047
GENERAL INFORMATION:
APPLICANT: Crabtree, Gerald R.
APPLICANT: Spencer, David M.
APPLICANT: Wandless, Thomas J.
APPLICANT: Belshaw, Peter
TITLE OF INVENTION: GENES AND OTHER BIOLOGICAL EVENTS
                                                                                                                                                     GENERAL INFORMATION:
APPLICANT: Crabtree, Gerald R.
APPLICANT: Schreiber, Stuart L.
APPLICANT: Spencer, David M.
APPLICANT: Wandless, Thomas J.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              PCT-US95-16415-30

Sequence 30, Application PC/TUS9516415

GENERAL INFORMATION:

APPLICANT: The Scripps Research Institute
TITLE OF INVENTION: IN VIVO ACTIVATION OF TUMOR-SPECIFIC
TITLE OF INVENTION: O'TOTOXIC T CELLS
NUMBER OF SEQUENCES: 38

CORRESPONDENCE ADDRESS:
ADDRESSEE: The Scripps Research Institute
STREET: 10666 North Torrey Pines Road, TPC-8
THEREOF IN PHARMACEUTICAL COMPOSITIONS
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Length 9;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Length 9;

GENERAL INFORMATION:

GENERAL INFORMATION:

APPLICANT: Lohning, Corinna

APPLICANT: Lohning, Corinna

TITLE OF INVENTION: No. 6731136el methods for displaying (poly) peptides/proteins on b.

TITLE OF INVENTION: particles via disulfide bonds

TITLE OF INVENTION: particles via disulfide bonds

FILE REFERENCE: MORPHO/11

CURRENT APPLICATION NUMBER: US/09/809,517A

CURRENT FILING DATE: 2001-03-15

PRIOR APPLICATION NUMBER: EP 99114072.4

PRIOR APPLICATION NUMBER: EP 00103551.8

PRIOR PILING DATE: 2000-02-18
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        ö

Patent No. 6653532

GENERAL INFORMATION:

APPLICANT: Raap, Maik

APPLICANT: Heyer, Arnd G.

TITLE OF INVENTION: FLOWERING BEHAVIOUR OF PLANTS

FILE REFERENCE: 2323.0001

CURRENT APPLICATION NUMBER: US/09/460,676B

CURRENT PILING DATE: 1999-12-14

PRIOR APPLICATION NUMBER: DE 19857654.4

PRIOR APPLICATION NUMBER: DE 19857654.4

PRIOR PILING DATE: 1008: 5

SOFTWARE: FastSEQ for Windows Version 4.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 70.8%; Score 17; DB 4; Length 8; 50.0%; Pred. C;Accession: A6679
C;Accession: A6679
C;Accession and biological activity of a novel kinin ([Thr(6)]bradykinin) from th A;Reference number: A60579; MUID:90126625; PMID:2298179
A;Accession: A60579
A;Molecule type: protein
A;Residues: 1-9 cCON>
C;COMment: This peptide increases aortic blood flow but, unlike bradykinin in mammalian
C;Superfamily: unassigned animal peptides
C;Keywords: plasma
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Acidise

bradykinin-like peptide I - Japanese pond frog

C;Species: Rana nigromaculata (Japanese pond frog)

C;Date: 09-Sep-1994 #sequence_revision 09-Sep-1994 #text_change 09-Jul-2004

C;Accession: Acidis
